SMART HEALTH & SAFETY SOFTWARE

Real-time reporting

Instant incident notifications

Create & complete live checklists

Efficient risk assessments

Manage your assets & equipment

Saves time & improves efficiency

Expert support from CMIOSH consultants

Trusted by more than 6,500 organisations

Smart automation options

Sends alerts when legislation changes

HOW DOES T100 PAY FOR ITSELF?

1. Helps to keep staff safe, reducing time off due to injuries and avoiding costly claims.
2. Improves efficiency, allowing health & safety managers to reduce admin and focus on improving safety.
3. Helps you to stay compliant - reducing the risk of fines and damaged reputation.
4. Increased productivity - smart automation and saved templates can save time across the organisation, not just in your safety team.
5. Never miss a thing - T100's reminder and task allocation features ensure nothing slips through the net.
6. Gains you access to advice and support from our CMIOSH-qualified safety consultants.

T100 MODULES & FEATURES

Risk Assessments

- Create standardised risk assessments quickly and easily with pre-built templates - or create your own!
- Manage all risk assessments in one place, with oversight of your compliance score and control measures.

Asset Manager

- Ensure that all equipment is up to date with inspections and maintenance with automated reminders.
- Use QR code stickers and our mobile app to make on-site inspections quick and easy.

Checklists

- Choose from our library of checklists, or create your own, for inspections, maintenance, processes and more.
- View checklists in real time, allowing you to spot and address issues early.

Incident Manager

- Receive instant notifications if accidents occur, and store all information, evidence and documents in one secure place. You can also create your own incident types.
- Demonstrate compliance and that best practice is being followed.

Reporting Centre

- Gain oversight of health and safety performance across the organisation.
- Quickly generate comprehensive reports, using pre-existing templates or a custom format.

The modules shown here are available as a complete system, or as a standalone option, allowing you to create a system that meets your organisation's specific needs.

Other modules include:

- Safe Systems of Work
- Policies and Handbooks
- Method Statements
- Permit to Work
- Document Register
- Task Manager
- Staff Handbook
- Fire Risk Assessments
- H&S/ ISO Procedures
- Information Library
- Self Audits
- Contractor Manager
- Training Centre
- COSHH
- E-Learning

OPTION TO INTEGRATE HR & E-LEARNING

E-Learning

- Range of courses including COSHH (Hazardous Substances); Fire Safety; First Aid and Working at Height
- Tailored courses, adapted to suit your needs
- Bespoke and build-your-own courses
- Can be used on our LMS or any SCORM-compliant LMS
- All courses certified by either RoSPA, CPD or IIRSM

HR

- Employee records
- Policy management
- Absence & holiday management
- Disciplinary & grievances
- Onboard/offboarding
- Training/competency records
- Recruitment
- Employment tribunal management
- Occupational health referrals
- Full reporting across HR, safety and e-learning
- Induction management

TESTIMONIAL

"We have made extensive use of the excellent T100 risk assessments that provide simple scoring and suggested control measures. The system includes a vast array of template checklists which have met our needs in critical operational areas of the business.

"T100 has also proved highly effective in its provision of training management functions and its integrated array of pre-prepared 'toolbox talks' that we have deployed extensively."

Philip Plume
Health and Safety Manager

BOOK A DEMO

The best way to discover how T100 can revolutionise your health and safety processes is to see it action! Contact us using the details below to book a demo and our team will show you what it can do.
